

VOLLEY SUPER SOFT

TS-15

BV 15

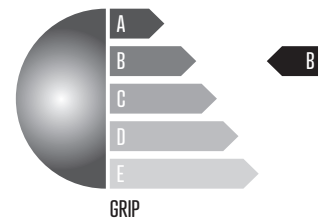

BV 20

VOLLEY SUPERSOFT are the world-famous starting balls in volleyball; they are made with an ultra-soft, non-shock plastic compound that ensures maximum safety during use.

The BV 15 item is lightweight and large, a feature that slows down flight by facilitating catching and throwing.

Both of these mini-volleyballs are also suitable for sensory-perception activities and hand-eye coordination games.

TRIAL
TAILOR MADE PROJECT

PRINT - the ball is printed. Single-colour or two-colour. It is possible to customise the product.

TECHNICAL FEATURES

All of our items are made by rotational printing technology, which allows for items with uniform and perfectly balanced thicknesses.

Thanks to patented, custom-designed and built machinery, we are able to laminate multiple layers of material in order to obtain unique technical items.

**1L - 1 LAYER**

c. STRUCTURE and GRIP made of compact, expanded synthetic rubber.

VALVE

All of our sports equipment is re-inflatable thanks to a small valve made of lubricated rubber, which allows easy needle insertion. Each valve is positioned in place using soap and water without the application of glue, and can always be easily replaced in case of air leakage.

This important patent extends the service life of each TRIAL tool over time. The very light weight of each valve never creates imbalance in rotations and flight paths.

CODE	DESCRIPTION	TECHNICAL FEATURES
BV 15	First Volley	Dim. cm 24 - Color: Fuchsia - Weight: kg 0,220 - Packing: 15 pcs
BV 20	Volley	Dim. cm 21 - Color: Yellow - Weight: kg 0,200 - Packing: 22 pcs
